

EquiChain Tokenomics

Total Token Supply 300,000,000 Equi

Allocation Breakdown

1. Public Distribution (Funding Rounds):

82% of total supply – 245,000,000 Equi's

- **Pre-Seed Phase:** 5,000,000 Equi's (at \$0.10 per token)
- **Seed Phase:** 40,000,000 Equi's (at \$0.15 per token)
- **Series A Phase:** 200,000,000 Equi's (at \$0.25 per token)

Purpose:

- Raise capital for platform development, marketing, and operations.
- Distribute tokens to early adopters and institutional investors.

2. Founders Allocation:

5% of total supply – 15,000,000 Equi's

Vesting Period: 4 years

- 12-month cliff (no tokens released in the first year).

- 25% released after the first year, followed by monthly vesting for 36 months.

Purpose:

- Reward and incentivize long-term commitment from the founding team.
- Align founder interests with the platform's success.

3. Foundation Allocation:

15% of total supply – 40,000,000 Equi's

Managed by the EquiChain Foundation.

Use Cases:

- **Ecosystem Development:**

Funding new Asset Tokens (e.g., Tax-Lien, Solar, and future tokens).

- **Strategic Partnerships:**

Collaborations with asset managers and institutions.

- **Incentive Programs:**

Attracting early adopters and liquidity providers.

- **Operational Expenses:**

Covering long-term platform maintenance and upgrades.

- **Governance:**

Foundation tokens will be released periodically, with transparency ensured through smart contracts or DAO mechanisms.

Token Vesting Schedule

Purpose: To prevent market flooding and ensure long-term stability.

Category	Allocation	Vesting Period
Public Distribution	245,000,000 Equi	Immediate after sale (no lock-up)
Founders	15,000,000 Equi	12-month cliff, 36-month vesting
Foundation	40,000,000 Equi	Periodic releases (governance-based)

Token Utility

1. Passive Returns:

EquiCoin holders earn continuous returns in **USDC**, generated by profits from all Asset Tokens on the platform.

2. Access to Asset Tokens:

EquiCoin acts as the gateway to participating in Asset Tokens like Tax-Lien and Solar, providing exposure to high-value real-world investments.

3. Governance Rights (Future Implementation):

EquiCoin holders may participate in governance decisions, such as voting on new Asset Tokens or platform improvements.

Revenue Streams

1. Platform Fees:

Asset Tokens currently contribute 10% of their earnings to the EquiChain ecosystem. This percentage can be adjusted based on a foundation proposal and subsequent community voting, with votes weighted by EquiCoin holdings. Any changes to platform fees will apply only to new Asset Tokens. Contributions are distributed among EquiCoin holders.

2. Token Appreciation:

EquiCoin value grows as demand for platform participation and Asset Tokens increases.

Summary of Tokenomics Goals

1. Fair Distribution:

A majority (82%) allocated to public funding to encourage broad participation.

2. Long-Term Alignment:

Vesting schedules ensure founder and foundation commitment.

3. Ecosystem Growth:

Foundation allocation supports strategic partnerships and operational stability.

4. Market Stability:

Controlled token release prevents market flooding and maintains investor confidence.
